Business Requirements Document (BRD)

Project Name: ADNOXY Connect – Offline Advertisement Marketplace

Version: Final Draft

Date: 10-05-2025

1. Executive Summary

Objective:

Build a marketplace platform for **advertising agencies** to discover and book offline ad spaces (billboards, retail spaces) and for **property owners** to list and monetize their inventory. The MVP will focus on manual workflows for ownership verification and purchase requests, with admins mediating transactions.

Key Features:

- View listed billboards on Google maps and Google street view
- **Create Listing:** Users submit ad spaces; admins verify and publish.
- **Request to Book:** Users submit booking requests; admins connect parties and mediate transactions.
- **Admin as Intermediary:** All actions trigger WhatsApp/email alerts to admins.
- Listings with geotagging via Google Maps/Street View.

- Ownership verification via video/document uploads.
- Basic notifications and status tracking.

Monetization:

- Manual service fees (post-booking invoicing).
 - Future: Subscription plans, featured listings.
-

2. Project Scope

In Scope

1. User Roles:

- Browse listings.
- **Create Listing:** Submit ad space details + ownership proof (video/docs).
- **Request to Book:** Submit interest in a listing (no pricing/terms – admins mediate).
- Track request status (Pending/Completed/Cancelled).
- **Admins:** Approve ownership, mediate purchases, resolve disputes.

2. Admin Responsibilities:

- Verify listings (approve/reject).
- Mediate **all** booking requests (contact buyer/seller, negotiate terms, confirm completion).

3. Notifications:

- WhatsApp + email alerts to admins for **every** listing creation and booking request.

Out of Scope

- User-to-user communication.
- Payment integration (all transactions handled offline by admins).
- Advanced features: Analytics, dispute resolution tools.

- AR/3D ad previews.

3. Stakeholders

Role	Responsibilities
Users	Submit listings or booking requests.
Admins	Verify listings, mediate transactions, send invoices.
Developers	Build the platform with admin-centric workflows.

4. Functional Requirements

4.1 User Authentication

- Users: Sign up with email or phone number.
- **Admins:** Access dashboard for verification and request management.

4.2 Listing Management

- **Users Can:**
 - Create/edit listings with:
 - Location (Google Maps marker + Street View image).
 - Pricing type (fixed or negotiable).
 - Availability dates.
 - Ownership proof.
 - View/delete listings.
 - Search/filter listings by location, price, and type.
 - Submit "Request to Book" with proposed terms (price, dates).

4.3 Ownership Verification

- Users upload:
 - **Video:** Showing the ad space and ownership documents.

- **Documents:** Property deed, rental agreement.
- Admins review via dashboard and approve/reject.

4.4 Admin Dashboard

- **Sections:**
 - **Pending Listings:** Review/verify new listings.
 - **Pending Requests:** Track booking requests to mediate.
 - **Completed Transactions:** Log finalized bookings.
- **Actions:**
 - Approve/reject listings.
 - Add notes (e.g., "Contacted buyer on 15-May").

4.4 Purchase Workflow

1. **Booking Action:**
 - Clicks "Request to Book" → Enters contact details, proposed terms.
2. **Admin Alerts:**
 - Admin dashboard + WhatsApp message + email to admins with:
 - User contact info, listing details, and direct link.
3. **Admin Mediation:**
 - Contact post owner to negotiate terms.
 - Mark request as "Completed" once payment is confirmed offline.
4. **Status Tracking:**
 - Admins update the status manually.
 - Booking user sees the status updates in their profile.

4.5 Notifications

- Booking user:
 - "Your request for [Listing] has been sent to our team."

- "Your booking for [Listing] is confirmed!"
- Post owner:
 - "Your listing [ID] has been approved."
- **Admins:**
 - Real-time WhatsApp/email alerts for new requests.

5. Non-Functional Requirements

Category	Requirements
Performance	<3 sec page load time; handle 5,000 concurrent users.
Security	HTTPS, JWT authentication, masked contact details.
Third-Party APIs	Google Maps/Street View, Twilio (WhatsApp API).
Compliance	GDPR (data privacy), manual KYC for owners.

6. Workflow Diagrams

Booking Journey:

Browse Listings → Sign up → Submit Booking Request → Admins Notified → Offline Payment → Booking Confirmed

Listing Journey:

Create Listings → Sign Up → List details → Verify Ownership → Listing Published/Rejected → Receive Offers via admin → Confirm Booking

Admin Workflow:

Receive WhatsApp Alert → Contact Agency/Owner → Confirm Payment → Mark as Complete

7. Data Model

Key Tables:

- **Users:**

id | email | phone | created_at

- **Listings table:**

id | user_id | title | location | media_urls | verification_status | admin_notes

- **Booking Requests table:**

id | listing_id | user_id | status | admin_notes

- Admin Logs table:

id | action (listing/booking) | action_id | admin_id | timestamp

8. Risks & Mitigation

Risk	Mitigation
Delays in admin response	Define SLA (e.g., 24-hour response time).
Manual errors in payment tracking	Simple admin dashboard with request status tracking.
Low owner adoption	Offer free listings for early adopters.
Spam/fake listings	Strict verification (video + document checks).

9. Approval

Role	Name	Signature	Date
Project Sponsor	[Name]		
Technical Lead	[Name]		
Marketing Lead	[Name]
